SUMMARY

Full stack developer with 4 years of experience building scalable enterprise web applications using JavaScript, React.js, Node.js, Express.js, MySQL and MongoDB. Skilled in developing microfrontend architectures, RESTful APIs, cloud-native applications, and performance-optimized user interfaces.

Experienced in AWS services including S3 along with CI/CD pipelines and Agile development methodologies. Proven ability to deliver secure, high-performance solutions for enterprise and assessment-based platforms.

Strong expertise in JavaScript, Redux Toolkit, React Hooks, API integrations, and scalable backend development with focus on clean architecture and maintainable code.

Passionate about staying updated with the latest industry trends and technologies

PROFESSIONAL EXPERIENCE

Integra Software Services Private Ltd, Chennai
Associate L1 - Technology

Jul 2022 – June 26

Developed scalable full-stack applications using JavaScript, React.js, Node.js, Express.js, MySQL, and MongoDB across multiple domains. Built responsive UI components and RESTful APIs, focusing on performance, reusability, and maintainable architecture in Agile development environments. Leveraged GitHub Copilot and ChatGPT for development assistance.

PROJECTS

1. iPubEdit – Editor Tool

February 24 – June 26

- **Tech Stack:** JavaScript, Typescript, React.js, Node.js, Express.js, MongoDB, Python, jQuery, Ajax, Axios, GitLab, AWS, Jira
- **Application:** Developed an automated web-based editor to streamline and improve the efficiency and quality of academic manuscript editing before publication. Contributed to building features for manuscript workflow management, including document handling, editing support, and process automation to reduce manual effort and improve overall editing efficiency.

2. GRT – Branding Web Application for GRT Jewelers

January 24 – February 24

- **Tech Stack:** JavaScript, React.js, Node.js, Express.js, MySQL, GitLab, HTML, CSS, Bootstrap, Material UI
- **Application:** Worked on the UI module of a branding tracking application used to display and monitor festival-time promotional assets like flexes and posters, improving data visibility and user experience for internal tracking.

3. Learning Management Systems (Skillpilot, AME, Dvara KGFs)

July 22 – January 24

- **Tech Stack:** JavaScript, React.js, Node.js, PHP, MySQL, CSS, Bootstrap, Mustache, GitLab/Bitbucket, OpenProject, Linux, Nginx

- **Application:** Skillpilot, AME, and Dvara KGFs are Moodle-based Learning Management Systems used for employee training, assessments, and course/exam management. Worked on UI development, feature enhancements, performance improvements, and production deployments, ensuring stable and scalable application delivery.

EDUCATION

Under Graduate

May 2021

B.E. in Computer Science, Tagore Engineer College - Chennai

TECHNICAL SKILLS

Frontend:

React.js | JavaScript (ES6+) | Typescript | Redux Toolkit | React Hooks | Context API | HTML5 | CSS3 | Bootstrap | Material UI

Backend:

Node.js | Express.js | RESTful APIs | JWT Authentication | Redis Caching | API Integration

Database:

MySQL | MongoDB

Cloud & DevOps:

AWS S3 | CI/CD | GitHub Actions

Testing & Code Quality:

SonarLint | Debugging | Performance Optimization

Tools & Platforms:

GitHub | GitLab | Bitbucket | Jira | Agile Scrum | GitHub Copilot

KEY ACHIEVEMENTS

- Employee of the year – 2022
- Integra Q3 Nakshatra Award
- Best Performer on Project: Took end-to-end ownership of the *DvaraKGF* project early in my tenure, independently handling development, production support, and deployment across three phases, ensuring smooth delivery and stability.

LANGUAGES

- English
- Tamil

Declaration

I here by declare that the information furnished above is true to the best of my knowledge and belief.
